

How a prisoner funds America

By Lynn Schmaltz lynnsch@spinn.net

<http://educate-yourself.org/cn/prisonersfundamerica03oct04.shtml>

October 3, 2004

Hi--here's some interesting research on 'crimes'. It appears that all crimes are commercial and have a commercial value to them. It makes you look at improvements to the freeways, cities and towns in a different light especially when those improvements are funded by 'municipal bonds.' You'll also understand why there's no hurry to end the war in Iraq, and you may ask the question "who is shooting whom?" Take care, Lynn *****

Gxxx is investigating more into the criminal jail/prosecution aspects. The results are incredible. His strawman is currently on probation from activities that were the result of Cxxxx prosecution of 17 to 18 people who were attempting to help patriots to buy Cadillac's. He was put in jail for a year, then a half way house.

He's been researching admiralty. When he was ready to leave the half way house he was caught on the computer creating a bill of exchange and the guards and matrons thought it was criminal activity so they jerked him back into jail for violating his probation for putting a blank bill of exchange. Jxxx had advised him that he had to quit fighting these people or he'd be in dishonor under admiralty and he had to keep raising questions rather than fighting and denying the charges. He was only in jail about 4 or 5 days and when they tried to interrogate him to get him ready for his hearing where the judge would eventually put him back into prison. He started using the correct tactic of accepting and asking questions. He got the prosecutor (assistant) to throw up her hands and scream he was too smart for her, to just get out. He's been in a half way house since May.

The last time he had a probation hearing with his officer in Cxxxx, he'd gone to the meeting personally. Before he went, he'd written a letter to her, the judge, the prosecutor, and others, and said that he requested that they deliver to him the bonds from CUSIP which were being used to underwrite his time in prison and his time on probation. He wanted them to deliver the bonds being held by CUSIP and other government agencies so he could accept them for settlement and closure. When he went to his probation officer meeting he was disappointed because his probation officer wasn't there to meet with him. He filled out a form and left. It seems that no one wants to talk with him or meet with him now that he's asked for the CUSIP bonds so he can settle and close the bonds.

CUSIP is an acronym. Gxxx is telling us that all criminal prosecution is for the purpose for raising revenue for the United States of America and he'll tell us who that is. Now you'll have a better understanding of why people are in jail, why they are in prison, why they are on probation and why they are charged with everything from jaywalking on up through murder one. Jack further heard from others researching, and Gxxx is also saying that every American soldier who dies in Afghanistan and Iraq probably carries a \$10 million life insurance on him carried by our government. After all, every soldier, marine, or air force person is an asset to the United States of America. They have a huge investment in that particular soldier and his activity and it can explain why it is that the US is not so anxious to withdraw its troops from that area. It's a money making activity and they don't want to talk about the fact that they are making money on death

and that they are making money the incarceration and imprisonment on otherwise good hearted people.

Gxxx: The key to finding out what you want on the Internet is knowing how to put it into the computer. If you put the right information in there, you get the right answer. He's been finding out who the investor is, the 144 holders. They have a rule called the 144 holder. The rule is that they can't sell private investment securities that are not registered. The rule prohibits them from selling the prison bonds. They have to wait 6 months before they can sell a certain quantity of private securities without being registered, selling them as private securities. Basically there are 8 people on the board of directors of CCA (*Corrections Corporation of America*)-*Joseph E. Russell*, the top holder, and* John M Ferguson*. Russell owns 64,000 shares of CCA stock which is worth about \$70 million. Ferguson owns 34,000 shares valued at about \$37 million.

Fidelity Management and Research is the top stock holder, the top investment firm that is selling the bonds as investment securities. They pool them and sell them as mortgage backed securities. They also when they pool them, they sell them as mutual funds on the stock market. By pooling you mean the securities on the inmates. What they are doing is they are actually taking the mortgage backed securities, which are really bid bonds, performance bonds and payment bonds. They pool these bonds and when they pool them together they call them mortgage backed securities. They take these to TBA which is the Bond Market Association. It's an actual market for bonds. Anytime a bond is issued there has to be an underwriter.

The bonds have to be underwritten. Bonds that are issued have to be indemnified so there has to be surety (spelling?) to indemnify the bonds. The brokerage houses and the insurance companies indemnify the bonds. They're called surety companies.

After the surety companies indemnify the bonds, which are underwriting them, they do this through an investment banker or the banks themselves do this. They job it out to them. They buy up all these shares and turn around and sell them as investment securities. The shares represent the stock which represents the account of CCA.

All of this has been funneled through CCA, the Corrections Corporation of America. What they are doing is selling stock in the prison system by selling the prisoners' accounts as securities through the securities exchange. They are making huge amounts of money off it. They privatize the prisoners' accounts and bring all these investors in and what they are doing is underwriting all these prisoner's accounts (bonds). This is after the surety company guarantees the bonds. Then they are underwritten through an investment bank or banker. Then they are put out on the market and resold to the public. In other words the banks are buying up all the shares and then they resell them as investment securities to the public. The public then buys them as mutual funds or they can buy them as debt instruments, equity instruments. What they are really doing is they are buying up debt instrument. They are using the fiscal accounting cycle of accrual and they sell the prisoner's 'capital and interest' as it is called in accrual accounting. They resell these to the public because the prisoner did not do full settlement and closure on the account. They sell the prisoner accounts as a commercial dishonor and sell it to the public as a commercial dishonor.

When you go in the courts they always say they are operating under a statute jurisdiction. The Black's Law Dictionary 4th edition says a statute is a bond or obligation of record. That's what all the criminal statutes are bonds or obligation of record. Go in and read the definition of a recognizance bond and you find that it is a bond or obligation of record. They are selling bonds.

They are charging prisoners under a bond; the prisoner signs the bond and the bond becomes the agreement for the payback. This is done when the prisoner signs the final court papers at a sentencing hearing.

Just: how many of us remember when our government attempted to finance from the private sector during the Second World War? Weren't they selling war bonds? They were soaking up the people's equity in terms of buying bonds, transferring your funds to the government.

The government by purchasing those bonds, was promising to pay you back your investment at sometime in the future with interest. At that time what they were collecting from the people was their so-called cash equity. What Gene saying now is that people have gotten too poor, too stingy, and too smart to buy bonds to finance the government. How long has it been since you heard the Post Office or anyone trying to get you down to buy US savings bonds? So what they are doing now instead of getting us to voluntarily give our cash equity to the government for a promise to be paid back in the future, they are securing from us some violation of a statute by which the law ascribes from us a penalty; i.e., the payment of a sum of money due. Instead of collecting the cash from us, they put us through a criminal procedure where we dishonor the system and what Gene said is what is happening is they are selling our capital and our interest. In other words, they are selling the liability you had in whatever charge was brought against your strawman. They are taking that capital and interest that you should pay and are grabbing that from us and selling it on the open market to bankers and investors to transfer their funds to government which is covered by the bond of the violation of your strawman of that statute. In order to secure the bond the living soul is placed in prison as the surety to back the bond which is financed on the investment of the public market place in terms of the sales of stocks and bonds.

The public doesn't directly bid on my (the prisoner's) debt. Your debt is assumed by the bankers. The bankers issue secondary paper that allows me to invest in what they are holding as the holder in due course of the claim against your strawman. The reason they are doing this is because you dishonored the post settlement procedures for settlement and closure of the account. The prisoner should have come in and accepted and used his exemption. Since the prisoner dishonored the post settlement proceedings, then the prisoner is in dishonor and the issuance of the bonds by the financing system was done in order to pass the punishment on to him because of his inability to fulfill his post settlement objectives.

If you get into to dishonor by nonacceptance, what they are trying to do is get an acceptor which is the same thing as a banker. They need someone to pay off the obligation and if you get into dishonor, they sell your dishonor and put you into prison as the collateral and they sell the bond. The bond is issued and they get a surety to underwrite the bid bond with a performance bond and then they get an underwriter to underwrite the performance and payment bonds. What the performance bond does is it guarantees the bid contract, or the bid bond. What the bid bond does is guarantee the payment of the performance bond. This is done through a surety company. Then they get an underwriter or an investment banker to underwrite it. After it's underwritten, they sell it to the public as investment securities, debt instruments, or mutual backed securities.

It's all done through bonds...bonding. That's what all these municipal bonds are. What they doing is following everything through the prison system. The prison system is being privatized. Through privatization , private enterprise can fund the prison system cheaper than the government can. They are subsidizing everything through privatization.

ALEC does this; the *American Legislative Exchange Council*, promotes privatization through foundations like the *Reason Foundation* owned by David Knott. They get the foundations to promote this and gets investors to come in. Cornell was merged with *Trinity venture Company* which is an investment company. What they did was change their name to *Reid Trinity Venture* and then merged with *SB Warburg*. (Warburg was out of Germany or France and partnered with Rothschild). SB Warburg is in Chicago, Illinois, and they merged with BIF in Switzerland, which is a settlement and closure bank, and the biggest bank in the world for settlements. They are connected to *Cornell Company* which is owned by David Cornell.

Everyone is tied in. *Paine Webber Group* is the United States of America and all the big international corporations are the stockholders and own all the stock in CCA. Everyone is using our exemptions on the private side. They filed a 1096 tax return and show it as a prepaid account, as prepaid interest and they returned it back to the prisoner. They took the prisoners deduction for the exemption and they deduct the tax and the IRS bills the prisoner for the tax. So the corporations are stealing your exemption which is your intellectual property. What's wrong with this? They are not telling us what they are doing. It's all commercial. When you go into the court room everything is commercial. Vxxxxx in her seminar says the facts don't matter; the facts are on the moon. What matters is honor and dishonor. The courts have to dishonor the potential prisoner or get that 'person' to argue or get that 'person's' attorney to argue. Just like Martha Stewart. Argue and you're in dishonor and you'll end up in jail.

The attorneys are actors to make us think the whole process is a factual issue. They get us into the guilty/not guilty mode and they get into all the cloak and dagger or what evidence to present. It's a dog and pony show to cover up that they are after the debt money.

All corporations work on a fiscal accounting year which means that they spend debt. They can't get rid of the debt and balance the books unless they run it through our accounts on the private side. We the people run on a calendar year and the corporations run on the fiscal year. They can only balance their books is to run it through our accounts using our exemptions. Then they can do their reverse bookkeeping entry and go to post settlement and closure. They can't do that until the prisoners do the acceptance (if they do it). That what they are looking for in the court room under 3-410 is the acceptor. That means we are assuming the liability for the debt as the principal. A lot of times with debt the principal is always the primary libellant in the commercial setting. He has to assume the liability and then you get your remedy. Otherwise you don't get a remedy.

They sell your account to some corporation while you're sitting in prison. How many times has government ever had a case against anyone.

The attorneys have to attempt to get you to go right into argument and trial and go into dishonor. Axxxx was given documents from Redwood Trust on a mortgage foreclosure. She did an conditional acceptance and she did a heck of a job. She stopped them cold and they took the property off the market. At the end she said if they didn't answer her within 14 days she was going to resort to notarial protest and get remedy for dishonor. She went into the fact that their charter doesn't allow them to loan credit, she wanted to know the name of the company who was the source of the credit, she wanted the name of the account number, she wanted certified copies of the front and back of the promissory note. She was trying to get them to divulge that it was her secured party creditor that was the source of everything they were doing. She was forcing them to admit that it was her promissory note that was the basis of the credit instrument that they

loaned and that they had already sold the note to someone else and they didn't have it in their possession. What they do is they sell the notes just as they do when you go into prison. They endorse the note and they no longer the holder of the note. The mortgage company wasn't involved in this process....the attorneys are doing all this. What they are doing is coming to the private side to get the debt without any permission from the mortgage company. IN this case they quoted from the UCC, and it's from Lex Mercatoria, the Law of the Merchant.

If you read John Hall's book, it talks about /letter Rogatory/, indictments where you are indicted and brought into the court under a warrant. What the warrant is, is a demand for payment of debt.

What they did under admiralty in the court room is they are demanding payment. You sign a bond to be released until the civil complaint is prosecuted and then they release you under the bond until civil bond is prosecuted. If you didn't pay the debt they put you in prison until the debt is paid. They use the same terms in this practice book from 1700. This is an actual practice book. It was written by Courts Practice who worked in the Court of Arches for the Crown as a registrant. This is a private book, not meant for public viewing. It laws out the whole practice of admiralty during the American Revolution.

Hall translated this and put it in put it in district court in Maryland in 1809. This was written in 1692. It's an actual practice. Benedict is not a practice; it gives information about what admiralty is. Admiralty is all debt and it's all civil; it becomes criminal when the prisoner gets a contempt charge when he refuses to pay. They can keep you in jail until you pay the debt. The initial get out of jail bond releases you until you've successfully paid the debt. This book goes into the history and practice of admiralty. It tells how to set the bond, and do court room procedure. The laws haven't changed; the circumstances of the government have changed so admiralty can be applied instead of constitutional law. Warden comes from admiralty-warden of the sea. The warden is the warehouse man who is warehousing all the goods; he's the bailee. The commitment order is your bailment, your contract for the commitment of the goods. Then they put the goods in a warehouse and store them there (prisoners stored in prisons, just like the people stored in the pods in the movie, The Matrix).

Lynn Schmaltz

[Editor's Note: In the mid 1990's, I began finding out information about an educational process called 'Redemption' which referred to taking back your sovereign rights as a natural born citizen of America due to a deception that was perpetuated on the American people by the Illuminati during the 1930's. A number of legal 'fictions' were created at that time by federal fiat that declared that the U. S. was in a state of bankruptcy and that a 'policy' would now take over that established all legal matters-from civil to criminal-to be under the jurisdiction of the Uniform Commercial Code, the UCC, which is created by statutory laws ('laws' created by legislatures without approval -and usually without knowledge-of the general public), in place of Constitutional law which was created with the approval of the American people.

This fiction took "you", the flesh and blood creation of God out of the picture and substituted in your place something called 'the straw man'. Whenever you get a summons to appear in court, your name is printed in all capital letters because that is how the 'straw man' is distinguished from the flesh and blood, God-created man.

Since you show up and answer to your all-capital name on the docket, the court accepts you as the 'representative' of the straw man and proceeds to play the game with you. If you don't show up, they're still arrest you for failure to appear, because the state has already recognized you as the representative of the straw man-unless you learn how to break that connection (called a 'nexus') and take back your straw man from state 'ownership'.

I know it sounds complicated and you weren't told a thing about it, but I did tell you it was a "deception", remember?

If you don't realize that you are 'owned' by the state, then consider this: whenever you go to a car dealer and buy a new car, the "deed" (from the manufacturer) of that car is sent by the car dealer to the Secretary of State of the state in which you live. It's recorded and then destroyed.

You, in turn, are given a "title of certificate" by your state which says that you have a legal right to possess and use this car which is now "owned by the state" who received its deed.

"Your" ownership of the car is an "illusion", the reality is-the state owns the car.

Same for a marriage license. You are asking the state to give you permission to become man and wife. By seeking out said marriage license, you are affirming to the state that your are slaves of the state ("chattel") and you recognize that the 'massah' has authority over you for such things; otherwise you wouldn't be asking for its 'permission' in the first place.

Beginning to see the big picture, Bunkie?

To learn more, type in "redemption + straw man" into Google <<http://www.google.com/>> and see what comes up.

Don't forget, the debunkers are there too to dissuade you about the Redemption process, so don't let a little sand in your eyes throw you for a loop.

...Ken]
